

Aramis: Project progress in a dynamic context

Annemarie Manger

Head of Joint Team, Aramis

- Public-private partnership
- Aramis offshore pipeline capacity of **22 Mtpa**
- Expected to be operational from **2028**
- Minimum **7,5 Mtpa** starting volume
- Overall storage capacity expected **>400 Mt**
- Permitting ongoing since 2021
- Aramis will enable connections to several European clusters
- Strong cooperation needed across the CCS value chain

* in case of an appeal against the final permits, a one year delay of the Final Investment Decision and start-up is anticipated

Project milestones

- Feed award (Q4-2023)
- Transition to Joint Team (Q4-2023)
- Permit application (Q1-2024)

External context

- General Elections, 22 November 2023
- SDE++ 2023 outcome
- EC, German and French Carbon Management Strategies
